Education

VIT BHOPAL UNIVERSITY, BHOPAL

2022 - 2026

B.Tech in Computer Science & Engineering

Experience

Online Judge (AlgoUniveristy Co-op Internship)

May 2025- June 2025

- Developed a competitive coding platform enabling students to practice and evaluate programming problems in multiple languages.
- Built the frontend using React.js with responsive UI/UX design, and implemented the backend with Express.js and MongoDB for scalable data storage and user management.
- Designed and integrated a custom compiler service supporting C, C++ (compiler) and Python (interpreter) for real-time code execution.
- Deployed compiler microservice on AWS EC2 using Docker for containerization and scalability.
- Hosted frontend on Vercel and backend on Render, ensuring reliable CI/CD workflows.
- Applied a microservices architecture to decouple compiler, backend, and frontend for maintainability and independent scaling.
- Strengthened expertise in cloud deployment, containerization, distributed systems, and full-stack web development.

Projects

Data Hiding using Steganography

Dec 2024 – Apr 2025

- Designed and implemented a **Python-based steganography tool** to conceal sensitive data within digital images.
- Applied **pixel-level manipulation techniques** for data embedding while preserving image quality.
- Integrated **SHA-256 encryption** to secure embedded text and ensure data integrity.
- Implemented **password-based authentication** to restrict unauthorized data access.
- Enhanced the tool's robustness for **secure data transmission and confidentiality in communication channels**.
- Gained hands-on experience with **image processing (PIL, OpenCV)**, **cryptographic hashing**, and **data security best practices**.

Technical skills

- **Languages:** Python, Java, C++, JavaScript ,C, Typescript(Learning)
- **Frontend and Backend:** HTML, CSS, Bootstrap, TailwindCSS, React, Nextjs, Expressjs, Django, Vite
- **Technologies:** DSA(700+ on GFG), Machine Learning, Deep Learning, NLP, Data Science, Cyber Security
- **Clouds & Databases:** AWS, MongoDB, MYSQL
- **Web Technologies & Developer Tools:** Docker, Redis, Postman, VS Code, Github

Honours and Awards

Accelerator Programming Camp

present Batch of 2025

April 2025

AlgoUniversity

- Got selected being in top 1.4% out of 40,000 students who applied, got mentorship under the seniors engineers of Apple, Google, Grab Singapore and Alphagrep Singapore.
- Learned how to build Scalable systems, deployments and gained industry-level work experience.
